

New-concept headphones deliver pure sound.

Listen to music with the EPH-100...
And discover greater detail and clarity than ever before.

The EPH-100 Inner Ear Headphones are the result of Yamaha's desire to enable you to hear not only clear music, but the sounds of the performer's breathing or the bassist's plucking of the strings, and even the emotions the artist put into the music. These new-concept headphones use a 6mm (1/4") diameter super-compact driver to deliver the sound to your ears in pure form. Superb tuning only possible from Yamaha with its long musical instrument and audio experience reproduces every minute detail. With the EPH-100, you'll fall in love with your favourite music all over again.

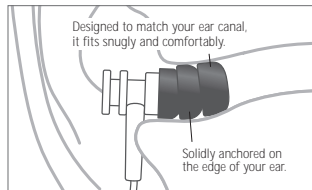

Super-Compact 6mm (1/4") Driver Reproduces Pure Sound

The EPH-100 features a 6mm (1/4") diameter super-compact driver that can be inserted straighter and closer to the eardrum than ordinary earphones. This allows you to hear pure, low-distortion sound without unwanted sound reflections. You enjoy natural, accurate reproduction with all sound sources.

Two-Stage Flange for Powerful Sound and Superior Comfort

The earpad has a two-part flange; the first part smoothly guides the driver into the ear, and the second fixes the earpad firmly in your ear. Tightly sealed for minimal sound leakage, it lets you enjoy powerful bass sound. The snug fit ensures optimal comfort.

Brass Body Reproduces Clear Sound with Sharp Definition.

The body is made of high quality brass, similar to that used in trumpets, which helps to minimise sound loss. Air outlet holes in the driver unit and exterior adjust sound quality and provide optimum sound emission with sharp definition.

Main Specifications	EPH-100
Type	Dynamic, Closed
Driver Unit	Φ6 mm (1/4")
Impedance	16 ohms
Sound Pressure Level	104 dB ±3 dB
Frequency Response	20 Hz – 20 kHz
Weight (w/ Cable)	13.5 g (0.46 oz)
Cable Length	1.2 m (47-1/4")
Connectors	3.5 mm (1/8") L-type mini stereo, 6.3 mm (1/4") stereo
